Subject: RISK WATCH - Elementary Safety Education Program

Hello School Safety Education Advocates,

My name is Tom Hufford, Asst. Fire Marshal in the Community Relations and Public Education Branch of the Tulsa Fire Department. One of my jobs is to help the schools with the National Fire Protection Association's **RISK WATCH** safety education program.

RISK WATCH is a program where the teachers teach children in the classroom about the 8 main preventable injury safety topics that are killing and injuring our children each year. The Tulsa Fire Department and many sponsors have teamed up to provide (at no cost to the schools) all the teaching materials and props needed to complete the **RISK WATCH** program. We only ask for 10 hours of classroom time per school year.

This is a very good program designed for Pre-K through 6th grade. I need your help to get this information and materials to the teachers, and I need your help to assure that the Pre Tests and Post Tests result tally sheets are turned in to me in a timely manner. Pre-Test results by Thanksgiving, and Post Test results by April 1st.

I would love to present the **RISK WATCH** program PowerPoint at school staff meetings, school principal meetings, teacher's conferences, or any venue available.

Please help me in my crusade to end injuries to, and deaths of our Tulsa children.

Thank you for your time in this matter.

Yours truly,

Tom Hufford
Asst. Fire Marshal
Tulsa Fire Department
